

## PENDING CLAIMS

1. (previously presented) A towing assembly, comprising:  
a hitch ball receiver having at least one cavity;  
a hitch ball; and  
a member connected with the hitch ball, wherein the member is engageable with the cavity to prevent rotation of the hitch ball during installation.
2. (previously presented) The towing assembly of claim 35, wherein said recess is acircular.
3. (original) The towing assembly of claim 2, wherein said recess includes a sidewall engaging said base.
4. (original) The towing assembly of claim 3, wherein said hitch ball receiver includes a first face and a second face, said recess being provided in said first face.
5. (original) The towing assembly of claim 4, further including a second recess, said second recess being provided in said second face.
6. (original) The towing assembly of claim 5, further including a spacer sized and shaped to be received in either of said recess and said second recess.
7. (previously presented) The towing assembly of claim 6, wherein said recess and said second recess having a substantially oval shape with two parallel flats thereon.
8. (previously presented) The towing assembly of claim 35, wherein said cavity is a channel.
9. (previously presented) The towing assembly of claim 8, wherein said hitch ball receiver is a ball mount head.

10 – 16 (cancelled)

17. (original) The towing assembly of claim 1, wherein said hitch ball receiver is a hitch bar.

18. (previously presented) The towing assembly of claim 17, wherein said hitch bar includes a tongue.

19. (previously presented) The towing assembly of claim 18 wherein said cavity is provided in said tongue.

20 – 21 (cancelled)

22. (previously presented) The towing assembly of claim 19, wherein said tongue includes a first face and a second face, said cavity being provided in said first face.

23. (previously presented) The towing assembly of claim 22, further including a second cavity, said second cavity being provided in said second face.

24. (previously presented) The towing assembly of claim 23, further including a spacer sized and shaped to be received in either of said cavity and said second cavity.

25. (previously presented) The towing assembly of claim 24, wherein said cavity and said second cavity have a substantially oval shape with two parallel flats thereon.

26. – 33 (cancelled)

34. (previously presented) The towing assembly of claim 1, wherein the member is a base integrally formed with the hitch ball.

35. (previously presented) The towing assembly of claim 2, wherein the cavity is a recess.
